Table 1-1: Applicable Documents

### 1.2 Reference Documents

None

## 2 SCOPE

The present Configuration Items Data List / As Built Configuration List identifies the applicable issue/revision of

- applicable requirement documents,
- specifications, drawings,
- engineering lists (materials, mechanical parts, EEE components, processes)

that represent the “As-Designed” and “As Built” configuration of the EPT-HET & STEP EM unit of the EPD consortium.

It is the objective of this document to provide all partners within the Solar Orbiter /EPD project with a common and reliable understanding of the design baseline of the project that is reflected in the above set of documents.

The document describes

- in section 4 the general EPT-HET EM configuration management organisation,
- in section 6 the document status list,

The CIDL/ABCL on system and sub-unit level contain in accordance with the EPD\_DRD-20110226:

The CIDL/ABCL shall contain for each configuration item the following as a minimum:

- The reference of the configuration items including:
  - CI number
  - CI name.
  - CI level.
  - Company's code (supplier and buyer)
- The list of configuration baseline documents defining the configuration in terms of requirements, design and verification, with their evolution status including NCRs and RFWs and their approval status. These shall as a minimum include:
  - Drawings (Including assembly and interface drawings).
  - Circuit functional diagrams.
  - Specifications.
  - Test procedures and plans.
  - Design verification matrix.
  - EEE list.
  - Material, mechanical part and process list.
- The current configuration status (such as "as designed", "as built"),
- The status reports on changes, deviations and waivers,
- The status reports on change implementation and verification.

### 3 GLOSARY AND DEFINITIONS

#### 3.1 Acronyms and Abbreviations

<b>AIT</b>	Assembly, Integration and Test
<b>AIV</b>	Assembly, Integration and Verification
<b>BB</b>	Bread Board
<b>BDD</b>	Block Diagram Drawing
<b>BOL</b>	Beginning Of Life
<b>CC</b>	Configuration Control
<b>CIDL</b>	Configuration Item Data List
<b>CIL</b>	Critical Item List
<b>CVCM</b>	Collected Volatile Condensable Material
<b>DCL</b>	Declared Components List
<b>DDV</b>	Design Development and Verification
<b>DML</b>	Declared Materials List
<b>DMPL</b>	Declared Mechanical Parts List
<b>Doc.</b>	Document
<b>DPL</b>	Declared Processes List
<b>ECP</b>	Engineering Change Proposal
<b>EH</b>	Electrical Harness
<b>EICD</b>	Experiment I/F Control Document
<b>EMC</b>	Electromagnetic compatibility
<b>EOL</b>	End Of Life
<b>EPD</b>	Energetic Particles Detector
<b>EPT</b>	Electron, Proton Telescope

<b>FDIR</b>	Failure Detection, Isolation and Recovery
<b>FEE</b>	Front End Electronics
<b>FM</b>	Flight Model
<b>FMECA</b>	Failure Mode, Effects, and Criticality Analysis
<b>FPA</b>	Focal Plane Assembly
<b>GSE</b>	Ground Support Equipment
<b>HET</b>	High Energy Telescope
<b>H/W</b>	Hardware
<b>I/F</b>	Interface
<b>ICD</b>	Interface Control Document
<b>LLI</b>	Long Lead Items
<b>MAIT</b>	Manufacturing, Assembly, Integration and Test.
<b>MOC</b>	Molecular Contamination
<b>NA</b>	Not Applicable / No applicable
<b>NR</b>	Normative Requirement
<b>PA</b>	Product Assurance
<b>PAC</b>	Particulate Contamination
<b>PDF</b>	Portable Document File
<b>PDR</b>	Preliminary Design Review
<b>PIPS</b>	Planar Implanted passivated Silicon
<b>QA</b>	Quality Assurance
<b>RfD</b>	Request for Deviation
<b>RML</b>	Recovered Mass Loss
<b>SE</b>	System Engineering
<b>SRR</b>	System Requirement Review

# EPT-HET & STEP EM Configuration Item Data List /As Built Configuration List

<b>SSD</b>	Solid State Detector

<b>STM</b>	Structural and Thermal Model
<b>SW</b>	Software
<b>TAD</b>	Top Assembly Drawing
<b>TBC</b>	To Be Confirmed
<b>TBD</b>	To Be Defined

## 4 ORGANISATION

### 4.1 Responsibility

Within the EPT-HET & STEP project, the configuration management is part of the tasks of the EPT-HET & STEP Project Manager.

EPT-HET & STEP configuration control is responsible for the systematic evaluation and co-ordination of all changes in the EPT-HET & STEP configuration. Configuration control ensures that all requirements and engineering documentation is identified and that all changes to that documentation will be reviewed in a systematic manner to determine the validity and impact of changes. Configuration control will also ensure that all affected organisations and parties will be cognisant of changes and will participate in the change decision making process. Configuration control activities start with the release of the first approval documentation.

### 4.2 Configuration accounting

Documents that shall be considered for the construction and manufacturing of any constituent of EPT-HET & STEP EM are those that are available:

- In paper format (located at the University of Kiel - Institut fuer Experimentelle und Angewandte Physik/ Extraterrestrische Physik)
- In electronic format
- As reference

Among others all documents that are listed within the present document are part of the EPT-HET & STEP Reference Library in electronic and paper format.

### 4.3 Software Version Number Method

N/A

### 4.4 Hardware marking and labeling

EPT-HET & STEP EM housing parts will be marked with special cleanroom pens and labels for the connectors, thermistor lines and external power wires.

5 EM RFD RFW AND NCR STATUS LIST

<i>Filename</i>	<i>EPD codification</i>	<i>Description</i>	<i>Delivered</i>	<i>Status</i>

CAU NCR Status List, Issue #, Date #					
NCR No	Classification	Issue / Date	Item Affected	Status	Description of Non-Conformance

## 6 DOCUMENTATION STATUS LIST

### 6.1 General

The documents listed below provide the general documentation overview/ status of all documents that are valid for the EPT-HET & STEP EM project. Those documents quoted in section 6.4 are contained as well.

### 6.2 Documentation structure

The EPT-HET & STEIN documentation is structured according to the following table. The entries in the column "document" are the main documents. The overall document configuration is given in section 6.4.

<i>Ident.</i>	<i>Discipline</i>	<i>Document</i>	<i>Bookkeeper</i>	<i>Remark</i>
<b>01.00</b>	<b>External Applicable Documents</b>			
01.01		Experiment Interface Document part A	ESA	
01.02		Experiment Interface Document part B	EPD Project Office	
<b>02.00</b>	<b>External reference Documents</b>			
<b>03.00</b>	<b>Management, General Engineering, Contractual</b>			
03.01		Project schedule	Univ. Kiel	
<b>04.00</b>	<b>Configuration control</b>			
04.01		Configuration item data list	Univ. Kiel	
04.02		RfW/RfA	Univ. Kiel	Copies and status list
04.03		NCRs	Univ. Kiel	Copies and status list
<b>05.00</b>	<b>PA documents</b>			
05.01		Declared Material, Parts and Process Lists	Univ. Kiel	
05.02		EPT-HET, SIS & STEIN Product Assurance Plan	Univ. Kiel	
05.03		EPD Product Assurance Plan	EPD PO	

<b>06.00</b>	<b>Technical specifications</b>			
06.01		EM EPT-HET & STEP interface document	Univ. Kiel	
<b>07.00</b>	<b>Drawings</b>			
07.01		MICDs	Univ. Kiel	
07.02		All (top level and detailed drawings)	Univ. Kiel	
<b>08.00</b>	<b>CAD models</b>			
08.01		Electrical Assembly Procedures EPT-HET & STEP EM	Univ. Kiel	
<b>09.00</b>	<b>Software</b>			
<b>010.00</b>	<b>Verification and Validation Documents</b>			
10.01		Test Procedures	Univ. Kiel	
10.02		Test Reports	Univ. Kiel	
10.03		Traceability & Verification Matrix	Univ. Kiel	
10.04		Instrument Assembly, Integration and Test Plan	Univ. Kiel	
<b>11.00</b>	<b>Operations</b>			
<b>12.00</b>	<b>Scientific experiments</b>			

### 6.3 Document nomenclature

The formal documents delivered to the EPD Project Office will follow the EPD Documentation Codification given in SO-EPD-PO-TN-0002 (CADs and MICDs of Kiel units will follow the nomenclature given in the EID-A).

Internal Kiel documents are identified by document type, number and author and/ or running numbers.

## 7 EPT-HET EM. ITEM UNDER TEST BUILD STANDARD REQUIREMENT

The following table summarizes the build standard of the EPT-HET EM compared with the EIDA R-554 from [AD-1]:

**Table 7** EPT-HET EM build standard compared to EIDA R-544 from [AD-1].

<b>EIDA R-544:</b> The PI shall ensure that the instrument EM units have the following minimum build standard:	<b>EPT-HET EM build standard</b>	<b>Comments</b>
<ul style="list-style-type: none"> <li>electronics flight standard except for parts quality</li> </ul>	Partially compliant	ALDEC adaptors for FPGAs, non-qualified soldering. LVPS interface tested and compliance.
<ul style="list-style-type: none"> <li>commercial parts have to be of same technology, same supplier as FM parts</li> </ul>	Partially compliant	EEPROM and some passive parts not from same supplier of FM parts.
<ul style="list-style-type: none"> <li>mechanisms flight representative for electrical actuators</li> </ul>	N/A	
<ul style="list-style-type: none"> <li>structure flight representative for mounting and shape</li> </ul>	Partially compliant	Extra mechanical housing part to accommodate the FPGA adaptor.
<ul style="list-style-type: none"> <li>Electrically representative as needed for conducted EMC tests (emissions and susceptibility).</li> </ul>	Compliant	
<ul style="list-style-type: none"> <li>Software flight standard as needed for all command/ control/ data interactions with the spacecraft.</li> </ul>	Compliant	
<ul style="list-style-type: none"> <li>harness flight representative</li> </ul>	Compliant	

## 8 STEP EM. ITEM UNDER TEST BUILD STANDARD REQUIREMENT

The following table summarizes the build standard of the STEP EM compared with the EIDA R-554 from [AD-1]:

**Table 8.** STEP EM build standard compared to EIDA R-544 from [AD-1].

<b>EIDA R-544:</b> The PI shall ensure that the instrument EM units have the following minimum build standard:	<b>STEP EM build standard</b>	<b>Comments</b>
<ul style="list-style-type: none"> <li>electronics flight standard except for parts quality</li> </ul>	Partially compliant	Non-qualified soldering, digital board not FM representative. No detector system. LVPS interface tested and compliance.
<ul style="list-style-type: none"> <li>commercial parts have to be of same technology, same supplier as FM parts</li> </ul>	Partially compliant	FPGA, EEPROM and some passive parts not from same supplier of FM parts.
<ul style="list-style-type: none"> <li>mechanisms flight representative for electrical actuators</li> </ul>	N/A	
<ul style="list-style-type: none"> <li>structure flight representative for mounting and shape</li> </ul>	Non-compliant	Old STEIN structure as agreed during the ESA-EPD STEIN meeting on <b>25.02.2013</b>
<ul style="list-style-type: none"> <li>electrically representative as needed for conducted EMC tests (emissions and susceptibility).</li> </ul>	Partially compliant	No detector system on EMC tests.
<ul style="list-style-type: none"> <li>software flight standard as needed for all command/ control/ data interactions with the spacecraft.</li> </ul>	Compliant	
<ul style="list-style-type: none"> <li>harness flight representative</li> </ul>	Compliant
